DETAILED ACTION

- This action is responsive to the following communication: an Amendment filed on 3/1/04.

Response to Arguments

- Applicant's arguments, see pages 4-6, filed on 12/23/04, with respect to independent claims 1, 10, 18, 27, 35, and 44 have been fully considered and are persuasive. The rejections of claims 1, 10, 18, 27, 35, and 44 have been withdrawn.

Allowable Subject Matter

- Claims 1-51 are allowed.
- The following is an examiner's statement of reasons for allowance: The cited prior arts of record (US 6181440 and US 6161185) fails to teach and/or suggest: US 6181440 to Masuda teaches a facsimile apparatus with control panel, wherein the operators utilized the control panel to retrieve the protected documents via inputting a password associated with documents; US 6161185 to Guthrie teaches a personal authentication system that utilizes a challenge-and-response method of identification. A client generates a response to challenge, which is provided by a server. The response is a combined function of the server's challenge, a serial number assigned to the client, and a Secure Authentication Database password provided by the user. The SADB password may be automatically generated by the server and maybe altered by the user at later time. However, the combinations of Masuda and Guthrie fail to teach and/or suggest "an issuing means for automatically issuing a new password *in response to receiving from a user a request for retrieval of the document* data by said receiver, wherein the user is notified of the new password if the user is authorized", which can be found in independent claims 1, 10, 18, 27, 35, and 44.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
